**Amendments to the Specification:**

Please replace paragraph [0005] with the following amended paragraph:

According to the invention there is provided a work station having a base; a user support affixed to the base; and an overhead hanger affixed to the base. The overhead hanger has a rear portion extending upwardly behind the user support and an overhead portion extending forwardly above the user support a sufficient distance so that when a user is positioned in the user support, the overhead portion is above the user. The overhead hanger further includes a peripheral mounting system affixable to the overhead portion, proximate a distal end of the overhead portion. A horizontally disposed pipe affixed to the base, a vertically oriented sleeve affixed to a distal end of the pipe, a rod telescopically slidable and rotatable within the sleeve, the rod having a horizontal portion extending from a top end thereof and a computer mouse tray and keypad tray, each independently positionable about the horizontal portion.

Please delete paragraph [0011] :

~~Preferably, a computer mouse and keyboard support are affixed to the work station.~~

Please delete paragraph [0012] :

~~A frame may be affixed to the base having a vertical section, a rod telescopically slidable and rotatable within the sleeve and affixed at an upper end to a horizontally disposed bar, and a mouse tray and keypad tray pivotally coupled to the bar.~~

Please replace paragraph [0014] with the following amended paragraph:

In another aspect of the invention there is presented a method of providing a work station environment, which includes providing a user area defined by a base, a user support affixed to the base, and an overhead hanger affixed to the base, having a rear portion extending upwardly behind the user support and an overhead portion extending forwardly above the user support a sufficient

distance so that when a user is positioned in the user support, the overhead portion is above the user. The method provides a peripheral mounting system affixable to the overhead portion proximate a distal end of the overhead portion. The method further provides a horizontally disposed pipe affixed to the base, a vertically oriented sleeve affixed to a distal end of the pipe, a rod telescopically slidable and rotatable within the sleeve, the rod having a horizontal portion extending from a top end thereof and a computer mouse tray and keypad tray, each independently positionable about the horizontal portion.

Please delete paragraph [0016] :

~~The method may provide a mouse support tray and a keypad tray on a pivotal support frame affixed to the base.~~

Please delete paragraph [0017] :

~~The method may further include providing a frame affixed to the base having a vertical sleeve, a rod telescopically slidable and rotatable within the sleeve and affixed at an upper end to a horizontally disposed bar, and a mouse tray and keypad tray pivotally couple to the bar.~~
